

Reduce work cover claim costs by 25%

Pain Management *in practice*

Return to Work Professionals Workshop

Topic: Management of workers with musculoskeletal pain in order to achieve successful and durable return to work outcomes.

Learn from experienced pain management health professionals in this unique intensive workshop and reduce your costs.

Content in the workshop will include:

- Understanding musculoskeletal pain
- Identifying risk of a poor return to work outcome including use of risk assessment tools
- Overcoming obstacles to a successful return to work outcome

"...Some really practical tips that I will be writing down and sticking up on the wall at work..."

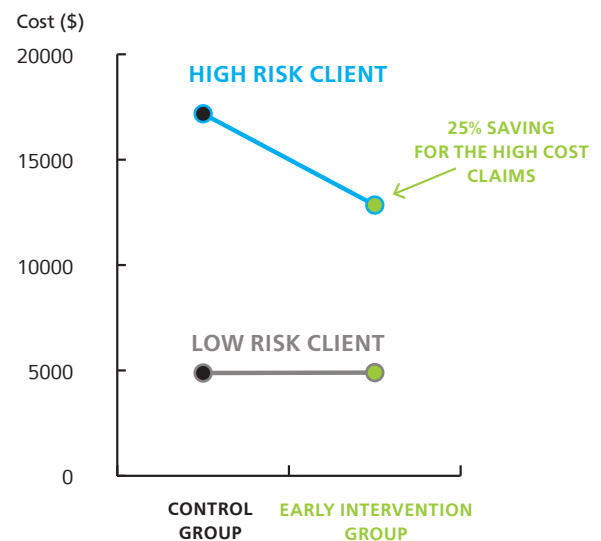

previous attendee

The workshop is delivered by an inter-disciplinary team to ensure the biopsychosocial aspects of pain are addressed to achieve superior return to work outcomes, further improving your toolkit of strategies.
