

Pain Management *in practice*

An informative, interactive and practical workshop designed to allow the physiotherapist, psychologist and occupational therapist to integrate a pain management approach into clinical practice.

Find out all the 'trade secrets' from a multidisciplinary pain management team (psychologist, occupational therapist and physiotherapist) in order to:

- Practically implement biopsychosocial and cognitive behavioural approaches into your treatment sessions.
- Address the issues that impact on the recovery of compensable clients.
- Identify and address the factors that may complicate a client's ability to cope with pain.
- Achieve self management in your complex chronic pain client.

Includes cross discipline workshops to provide an opportunity to network with psychologists and occupational therapists.

WHEN Saturday 9th October 2009, 9am-5pm

WHERE University of Melbourne, Hawthorn Campus
